1 Level 1 Heading: Document Features

This is a standard paragraph with some inline formatting. Here is some **bold text**, some *italic text*, and some `inline code`.

This is the second line of the same paragraph. The refactored parser should correctly join these lines together.

This is a new paragraph, separated by a single blank line. It demonstrates a simple link to [the VS Code website](#).

This paragraph is separated by multiple blank lines. It also contains a link with **bolded text** inside: [**GitHub**](#).

1.1 Level 2 Heading: Lists and Nesting

This section tests various list types.

1.1.1 Level 3 Heading: Bulleted Lists

- First item in a bulleted list.
- Second item, with *italic* and `code`.
- A nested list follows:
  - Nested item 1.
  - Nested item 2, which is **important**.
    * A deeper level of nesting.
- Back to the first level.

1.1.2 Level 3 Heading: Numbered Lists

1. First item in a numbered list.

2. Second item.

3. A nested numbered list:

    (a) Nested item A.

    (b) Nested item B.

4. Back to the main numbered list.

1.2 Level 2 Heading: Other Elements

This is an example of an indented text block, which should be offset from the left margin.

> This text is indented.

This is a final paragraph to ensure spacing is correct after all other elements.
